Continuation of 5. does NOT place the application in condition for allowance because: In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See In re Keller, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); In re Merck & Co., 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). At page 7 of the response argument is presented that the "[a] skilled artisan would regard the teaching of Wolter reference as essentially irrelevant with respect to the obviousness of the claimed invention." Argument of an attorney does not take the place of evidence in establishing what one of skill in the art would or would not have thought or considered. Acknowledgement is made of applicant having provided copies of journal articles in association with their response. It is noted that journal articles do not take the place of sworn statements and that such sworn statements have not been timely provided. Further, the articles provided have not been cited on a PTO-1449, nor accompanied with the requisite petition, certification and fee and accordingly, have not been considered on the merits.
